Objective

I've been working over 16 years in IT industry. I know several programming languages and technologies and took part in developing many projects Desktop and Web. During my career I had a chance to work on many companies around the world as freelance remote developer and on contract basis in Ukraine.

I am hardworking professional, creative thinking, results-driven with experience covering all aspects of the software development lifecycle including design, architectural systems research, prototyping, interface implementation, testing and maintenance. I am looking for a position as a Lead .NET Full-stack Software Engineer or Architect where my excellent technical skills and my professional experience will help to realize your projects or increase productivity and quality of existing solutions.

Skills

- Architecture Design
- .NET Framework and .NET Core
- Microservices
- TDD
- Docker
- Windows Azure
- Elastic Stack
